---

Do not tab over for *Introduction*. Instead, go to the ruler at the top of the page and drag the *Hanging Indent* symbol to the desired location. Then set tab for the page number. See resource entitled *How to Properly Align Page Numbers* for tab setting instructions.

Note that leader dots are optional in *Turabian 8.*

Tip: Format the contents page in single space to ensure proper spacing.

See Figures A.3 and A.4 in *Turabian 8* for other table of contents examples.
Note that this and additional pages of the contents require page numbers, bottom center—a change from Turabian 6. The title Contents, however, only appears on the first page.
