## INTRODUCTION

A review of the history of Jewish and Christian interpretation will reveal the many levels at which Scripture can be read. Each period has made contributions to an understanding of the complex nature of interpretation. Probably the most formative period for setting the parameters of current interpretive methods was the Reformation, which represented four major breaks in the history of interpretation: (1) a break with multiple meanings, (2) a break with traditional authority, (3) a break with Latin translations, and (4) a break with the medieval worldview. The literal method was reinstated as the primary tool for understanding the text of Scripture. In this method, the plain, literal meaning of a text within the historical and literary context is determinative for the interpretive process. Thus, this Reformation emphasis came to be called the grammatical-historical method. In a hermeneutical model focused on the three areas of text, interpreter, and audience, this Reformation method shifted the emphasis from the interpreter (the Roman Church and its traditions) back to the text.

The grammatical-historical method evolved into the historical-critical method in the eighteenth and nineteenth centuries.<sup>1</sup> However, a positivist historicism elevated reason over revelation. # Style-Paragraphs Continuity

After Paul established the church on the second missionary journey, he wrote 1-2 Corinthians from Ephesus on the third journey, about A.D. 57. Although a major city in the Greek age, Corinth's later Roman history is more central to an exegesis of these letters.

The story of Roman Corinth begins when the Romans destroyed the city after the Greeks lost the Achaean War in 146 B.C. Corinth lay deserted until Julius Caesar reestablished the city in 44 B.C. over a century later.
